Fog harvesting nets

Plastic

Polypropylene

Metal

?

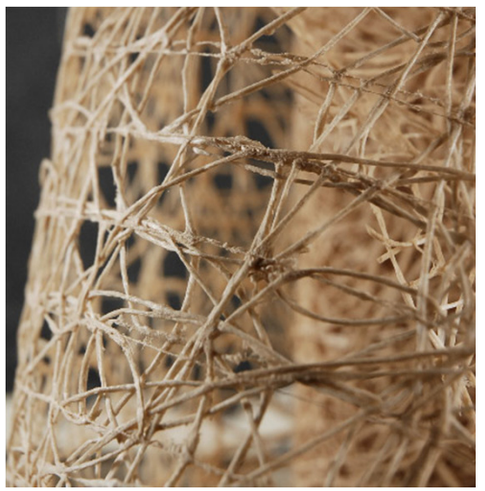

Today, fog harvesting nets are used in desserts of Atacama, Ethiopia and other places. But, the material used to make the meshes is NON - BIODEGRADABLE

Natural fibre Meshes

India has been blessed with abundant natural fibres due to its geographical placement. Coconut, sisal and bamboo is also found around Shillim. By treating them naturally, it is possible to make them hydrophobic so as to collect water from fog.

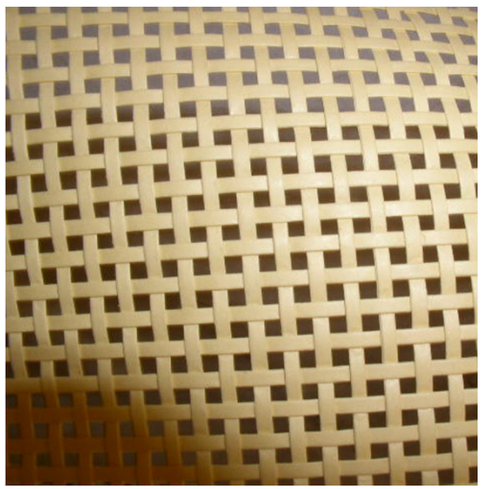

Coir – Coconut fibre

Sisal fibre

Bamboo fibre

Cane mesh
