

THE CENTROIDS OF THE SECONDARY SPHERES ARE EXTRACTED, TRANSLATED IN THE X DIRECTION, AND JOINED BY A POLYLINE.

THE POLYLINE MADE BY THE CONNECTION OF THE CENTROIDS IS EXTRACTED IN THE Z DIRECTION, MAKING A PLANE THAT WILL UNDERGO A SECOND EXTRACTION PRODUCING CUBES

WITH A SERIES OF TRANSFORMATIONS AND TRANSLATIONS, THE SECONDARY SET OF SPHERES IS TRANSMUTED INTO A RANDOM ARRAY OF CUBES THAT ARE THEN SCALED, ALLOWING THEM TO MOVE FARTHER AWAY FROM THE CENTROID OF THE INITIAL SPHERE

FARTHER FROM THE CENTROID OF THE INITIAL SPHERE
