THE KNOWN SPACE
OBSERVABLE UNIVERSE

SPLITING THE TIMELINE

DEFINING the Locations of
the planets at
TODAY AND THE PAST

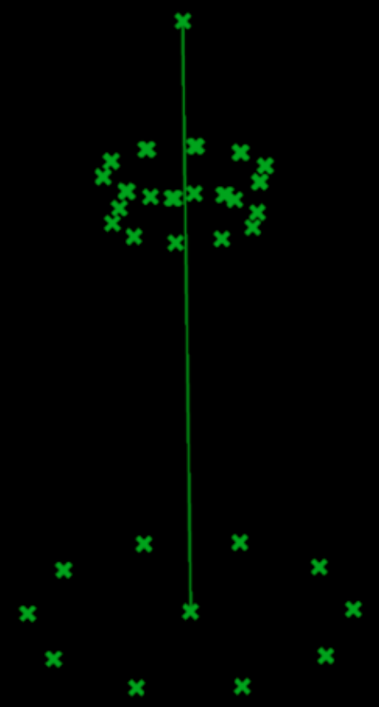

Populating the space to create some stars.

Some starts ın the space to avoid them. Don’t crash to a star!

Guide agents that move, scale and rotate to give Vortex Flow to the Planets.

Planets move in time to become ONE!

When they become one they explode again to come todays position.

Planets located at today..
