University Housing, Gandia

Case Study #4 of 5

Architect: Guallart Arquitectos
Location: Gandia, Valencia
Client: Visoren Renta
Date: 2011
Subject: Community Living, Shared spaces, New for of habitation, Spatial optimisation

Facility:

The University Housing in gandia, displays a new model of living that is responsive to the current social, economical and environmental context. Each community consists of a different number of residents, exhibiting the ideal number of people to create a successful and functioning shared space.

This project is a continuation of a previous project by Guallart Arquitectos caled Share Tower in 2003. An analysis was carried out in the process that identified the 13 necessities to live in congruence with residential planning code.

The current version of this has changed with the course of technology and minimised in certain areas. Below is an analysis of the essential items for the young professional of 2018 broken into:

Private:

Shared:
